

Dry Peas and Lentils

Lentil Production Up, Prices Up

According to industry estimates, U.S. lentil output increased 9 percent this year, as acreage increased 18 percent. A year ago, the season featured a short crop and prices well above the average of the previous 5 years. Yields in the primary growing areas of the Pacific Northwest dropped below those of a year ago. Industry estimates indicated lentil yields averaged 10.3 cwt per acre--the lowest since 1996. Despite the increase in output, lentil supplies will not be burdensome in the coming year because carry-in stocks were very low. As a result, lentil prices are expected to remain above the loan rates and at or above the strong levels of a season ago.

With lentil prices likely to remain strong throughout the marketing year, lentil area in 2004 will likely equal or exceed this year's level. Dry pea producers are also likely to increase area substantially in the coming year, especially in the upper Midwest, due in part to the safety net provided by the marketing loan program. Payments are currently running at \$2.68 per cwt for dry peas in both the PNW (\$6.68 loan rate less \$4.00 posted county price equals \$2.68 marketing loan payment) and the upper Midwest (\$5.89-\$3.21=\$2.68).

According to samples analyzed by the USA Dry Pea and Lentil Council, the 2003 Pacific Northwest dry pea and lentil crop contained no quality impairments. Thus, the average quality of the crop was rated at 100 percent U.S. number 1 grade.

The National Agricultural Statistics Service (NASS) released a one-time only September estimate of dry pea and lentil stocks in the September Grain Stocks report. From now on, NASS intends to estimate pea and lentil

Table 12--Selected U.S. dry pea and lentil export volume

Item	Crop year (July-June)			Change 2002-03
	2000/01	2001/02	2002/03	
--1,000 cwt--				Percent
Split peas	125	81	129	60
Green peas	1,100	1,170	1,582	35
Yellow peas	166	274	184	-33
Austrian winter	51	21	21	-2
Other peas	179	437	237	-46
Chickpeas	656	522	367	-30
Lentils	1,652	2,322	1,988	-14
Total	3,930	4,826	4,508	-7

Source: Bureau of the Census, U.S. Department of Commerce.

stocks only for December 1 and June 1 to support supply and use monitoring efforts (and budget exposure analysis) under the pea and lentil marketing loan program. The September 1 estimate indicated low carry-in stocks for lentils of 116,000 cwt with dry peas (excluding Austrian peas and chickpeas) at a more moderate 639,000 cwt.

Exports Mixed in 2002/03

U.S. export volume (including food aid) of all dry peas and lentils dropped 7 percent during crop year 2002/03 (July-June) to 4.5 million cwt. Lentil exports declined 14 percent but were following record-large 2001/02 volume. Chickpea export volume declined by almost a third as large world supplies cut into U.S. sales. Partly offsetting these declines were jumps in split pea (up 60 percent) and green pea (up 35 percent) exports. Splits were returning to 2000/01 levels after a slow year in 2001/02. Overseas movement of green peas increased as U.S. shippers were able to take advantage of reduced world supplies caused by the short 2002 Canadian crop.

1/ Applies to smooth green and yellow, wrinkled, winter (includes Austrian), miscellaneous (including marrowfat peas), and mixed dry peas

2/ Applies to all lentil varieties. 3/ Applies to desi and small-sieve kabuli chickpeas that fall through a 20/64 inch grading screen.

4/ Posted County Price.

The weekly loan deficiency payment rate is calculated as the loan rate less the PCF
